CloudCenter (CliQr) Services

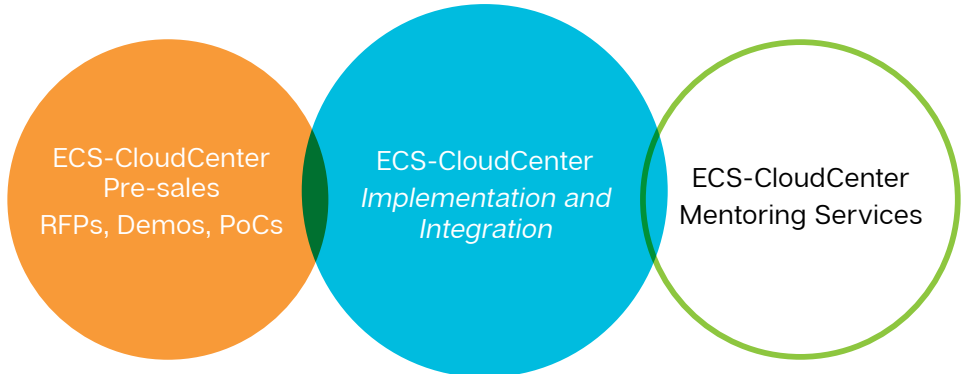

Cisco's first EMEA CloudCenter GTM and Services Partner

Originally the only EMEA GTM and Services partner of CliQr technologies, our breadth of experience in CloudCenter development, implementation, integration and adoption is second to none. This combined with our ServiceNow Gold Services Partner status makes us unique in the market.

ServiceNow Integration

Engage ESM originally co-developed the Cisco CloudCenter (CliQr) – ServiceNow integration and this is now certified and available from ServiceNow. Further to this we continue to enhance the integration with Cisco.

Pre-Sales Support

Using our SaaS based CloudCenter and ServiceNow labs we can deliver custom demonstrations and proof of value/concepts. RFP response support is also available earlier in the sales cycle.

Implementation & Integration

Integration of CloudCenter into a customer's operating environment is key to the success of project. Workshop based requirements gathering starts the process with key stakeholders. Functionality is then delivered using an Agile SCRUM based delivery. Standard integrations available include ServiceNow, SSO, Elastic Search and any other REST based interface.

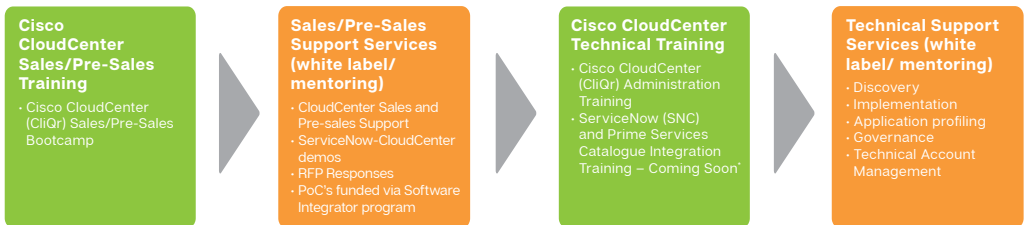

Training, Enablement & Adoption

Crucial to the success of any implementation, currently we are the only EMEA Cisco Partner certified to deliver both Sales and Technical CloudCenter training. Our adoption based approach ensures that any change to working is fully understood and accepted prior to deployment. Engage ESM are currently delivering these workshops across EMEA. Contact us today to understand how you can attend a CloudCenter Workshop.

Ongoing Mentoring Services

CloudCenter is a subscription based service which means that ongoing mentoring services are critical to both future renewal and expansion.
