

Cisco CloudCenter PoC

Summary of Proof of Concept Delivery

The prospect had been using a script based orchestration solution with limited success. The value of agnostic multi-cloud orchestration together with full governance of Shadow IT drives the value of the engagement.

EMEAR: UK

Sector: Finance
Number of Employees: 7,000
Number of DCs: 4 currently (consolidating to 3)
Number of Servers: 512 end state at 5 years
Server Platform(s): Linux, Windows, VMware
Networking: ACI
Storage: Netapp
ACI Customer: Yes (to be implemented)
Sponsor: Global Head of Infrastructure
Business driver: Reduced cost with increased governance

IT Initiative: IaaS, Migration Services and Managed Service

PoC: Customer SaaS

Timing: Dec 2016

Success Criteria:

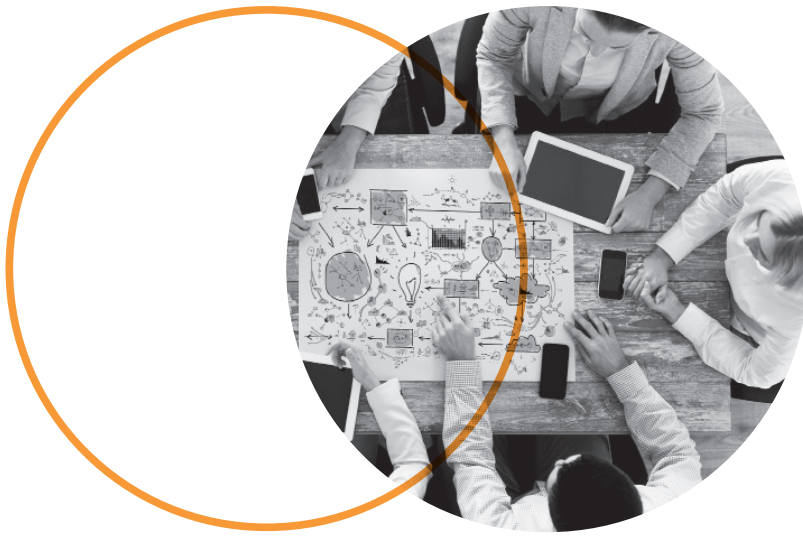

- ✓ Model Customer Application (Blockchain and Hadoop based MapR, underlying infrastructure and networking)
- ✓ Deploy to both AWS, Azure & Google with single application profile.
- ✓ ServiceNow Integration for request and CMDB update.
- ✓ Show charge back reporting
